Re: Application of BellSouth Telecommunications, Inc. to Provide In-Region
InterLATA Services Pursuant to Section 271 of the Telecommunications Act of
1996
Docket No. 2001-209-C

Dear Mr. Terreni:

BellSouth Telecommunications, Inc., d/b/a AT&T South Carolina is filing a Preliminary Data Notification Report for January 2009 data month. These changes will be discussed at the November 10, 2008 industry conference call.

Thank you for your attention to this matter.

Sincerely,

Patrick W. Turner

PWT/nml

Enclosure

cc: All Parties of Record
723423

PRELIMINARY JANUARY 2009 DATA NOTIFICATION

BellSouth Telecommunications, Inc., d/b/a AT&T South Carolina (“AT&T South Carolina”) is considering making the changes described in this document to generate results for the January 2009 data month. Results for the January 2009 data month will be posted as follows:

Preliminary results	February 20, 2009
Final results	February 27, 2009

AT&T South Carolina provides Data Notifications each month in compliance with the SQM Plan. This order specifies that when AT&T South Carolina proposes making any changes to the methods by which performance data is calculated, it must provide written notice. This notice must be provided on the first business day of the month before the data month in which the change will be made. AT&T South Carolina must also provide notification if it is considering making changes to the method of calculating data for the following month.

ENCORE Releases may affect monthly data flows from the source systems (e.g., LEO, LESOG, etc.) that PMAP uses to calculate measurements. AT&T South Carolina will make changes to PMAP to ensure that data continues to be correctly captured as ENCORE Releases are implemented.

System releases related to the merger between BellSouth and AT&T may affect monthly data flows from the source systems that PMAP uses to calculate measurements. AT&T South Carolina will make changes to PMAP to ensure that data continues to be correctly captured as system changes are implemented.

Ordering Measurements

- (1) *Affected Measures:* FOCT
O-9 Firm Order Confirmation Timeliness [FOCT]

Description of Change: Currently, AT&T South Carolina does not display products on the aggregate reports with numerators of “0” and also having a denominator greater than “0.” AT&T South Carolina proposes to modify the code in accordance with the business rules so these products are listed on the aggregate reports. (RQ9452)

Impact of Change: This change will have no impact to reported results; however, zero percent will be reflected on the aggregate reports to correlate with the 12-month reports.

- (2) *Affected Measures:* FOCT
O-9 Firm Order Confirmation Timeliness [FOCT]

Description of Change: Currently, AT&T South Carolina captures the last date timestamp for certain RPON records as a numerical format rather than a date format. The largest numerical value is then captured rather than the last date for the date timestamp field. AT&T South Carolina proposes to modify the code in accordance with the business rules so the last date timestamp is captured correctly. (RQ9930)

Impact of Change: For the September 2008 data-month in Florida, 64 UNE Other Non Design records were impacted by the date timestamp field. This proposed change would increase the UNE Other Non Design Non-Mechanized results from 89% to 94%.

- (3) Affected Measures: FOCT – AL, SC, MS
O-9 Firm Order Confirmation Timeliness [FOCT]

Description of Change: This measure should display the product group UNE Digital Loop \geq DS1 on the FOCT aggregate, CLEC specific, and 12-month reports for Alabama, South Carolina, and Mississippi. AT&T South Carolina proposes to modify the code in accordance with the business rules so the product group UNE Digital Loop \geq DS1 is displayed as a disaggregation on the PMAP reports. (RQ9916)

Impact of Change:

Alabama

1. For the August 2008 data-month in Alabama, the proposed change would add 187 fully mechanized firm order confirmations within three hours out of 187 total service requests for the product group UNE Digital Loop \geq DS1. This proposed change would display the result as 100% of CLEC firm order confirmations within three hours.
2. For the August 2008 data-month in Alabama, the proposed change would add 32 partially mechanized firm order confirmations within ten hours out of 42 total service requests for the product group UNE Digital Loop \geq DS1. This proposed change would display the result as 76.19% of CLEC firm order confirmations within ten hours.
3. For the August 2008 data-month in Alabama, the proposed change would add 38 non mechanized firm order confirmations within twenty-four hours out of 40 total service requests for the product group UNE Digital Loop \geq DS1. This proposed change would display the result as 95.00% of CLEC firm order confirmations within twenty-four hours.

Mississippi

1. For the August 2008 data-month in Mississippi, the proposed change would add 38 fully mechanized firm order confirmations within three hours out of 42 total service requests for the product group UNE Digital Loop \geq DS1. This proposed change would display the result as 90.47% of CLEC firm order confirmations within three hours.
2. For the August 2008 data-month in Mississippi, the proposed change would add 12 partially mechanized firm order confirmations within ten hours out of 26 total service requests for the product group UNE Digital Loop \geq DS1. This proposed change would display the result as 46.15% of CLEC firm order confirmations within ten hours.
3. For the August 2008 data-month in Mississippi, the proposed change would add 42 non mechanized firm order confirmations within twenty-four hours out of 42 total service requests for the product group UNE Digital Loop \geq DS1. This proposed change would display the result as 100.00% of CLEC firm order confirmations within twenty-four hours.

South Carolina

1. For the August 2008 data-month in South Carolina, the proposed change would add 195 fully mechanized firm order confirmations within three hours out of 198 total service requests for the product group UNE Digital Loop \geq DS1. This

proposed change would display the result as 98.48% of CLEC firm order confirmations within three hours.

2. For the August 2008 data-month in South Carolina, the proposed change would add 24 partially mechanized firm order confirmations within ten hours out of 30 total service requests for the product group UNE Digital Loop >= DS1. This proposed change would display the result as 80.00% of CLEC firm order confirmations within ten hours.
3. For the August 2008 data-month in South Carolina, the proposed change would add 55 non mechanized firm order confirmations within twenty-four hours out of 57 total service requests for the product group UNE Digital Loop >= DS1. This proposed change would display the result as 96.49% of CLEC firm order confirmations within twenty-four hours.

Maintenance & Repair Measurements

- (4) Affected Measures: PRT, OOS – LA only
M&R-4 (PRT) Percent Repeat Customer Troubles within 30 Calendar Days [PRT]
M&R-5 (OOS) Out of Service (OOS) > 24 Clock Hours [OOS]

Description of Change: This measure should display the UNE Line Splitting/Sharing and UNE EELs product groups on the OOS and PRT reports as disaggregations. AT&T South Carolina proposes to modify the code in accordance with the business rules so the OOS and PRT reports display the UNE Line Splitting/Sharing and the UNE EELs product groups for Louisiana. (RQ9774)

Impact of Change:

PRT

1. For the September 2008 data-month in Louisiana, the proposed change would capture PRT UNE Line Splitting/Sharing as 20.00% repeat troubles within 30 days.
2. For the September 2008 data-month in Louisiana, the proposed change would capture PRT UNE EELs as 10.86% repeat troubles within 30 days.

OOS

1. For the September 2008 data-month in Louisiana, the proposed change would capture OOS UNE Line Splitting/Sharing as 0.00% out of service troubles greater than 24 hours.
2. For the September 2008 data-month in Louisiana, the proposed change would capture OOS UNE EELs as 3.37% out of service troubles greater than 24 hours.

- (5) Affected Measures: OOS
M&R-5 Out of Service (OOS) > 24 Clock Hours [OOS]

Description of Change: Currently, AT&T South Carolina captures all troubles in the denominator of the Out of Service aggregate reports > 24 Clock Hours. This measure should only capture Out of Service reports (no dial tones, cannot be called, or cannot call out) troubles. AT&T South Carolina proposes to modify the code in accordance with the business rules to only capture Out of Service troubles in the denominator. (RQ9856)

Impact of Change:

Florida

For the June 2008 data-month in Florida, the proposed change would increase the CLECs' metric from 5.38% to 8.19%.

For the June 2008 data-month in Florida, the proposed change would increase AT&T's metric from 9.95% to 15.46%.

Georgia

For the June 2008 data-month in Georgia, the proposed change would increase the CLECs' metric from 14.47% to 20.01%.

For the June 2008 data-month in Georgia, the proposed change would increase AT&T's metric from 17.33% to 26.19%.
